DETAILED ACTION

Election/Restriction

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

I. Covalent or noncovalent interactions between the biological moiety and composition.

If noncovalent interactions are selected then a further species election is required:

- a.) Hydrophobic interaction
- b.) Hydrophilic interaction
- c.) Electrostatic interaction
- d.) Van der Waals interaction
- e.) Magnetic interaction

II. Biological Moieties

- a.) Biological moiety is a small molecule - claims 100 and 118
- a.) Biological moiety is a protein, peptide or antibody -claims 101 and 119
- b.) Biological moiety is a nucleic acid (DNA or RNA) - claims 102, 103, 120, and 121
- c.) Biological moiety is an amino acid - claims 104 and 122
- d.) Biological moiety is a ligand - claims 105 and 123
- e.) Biological moiety is an antigen - claims 106 and 124

Art Unit: 1641

f.) Biological moiety is a cell - claims 107 and 125

g.) Biological moiety is a subcellular organelle - claims 109 and 126

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 69-77, 96, and 109-116 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Art Unit: 1641

2. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chris Chin whose telephone number is (703) 308-3991. The examiner can normally be reached on Monday-Thursday from 10:00 am to 7:30 pm. The examiner can also be reached on alternate Fridays.
